Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

Applicant should note the disposition of the parent application in the specification.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muschelknautz et al. This patent discloses the basic process for pulverizing materials including delivering air along with material to a grinding chamber at at least Mach 1 speed. The manner in which this air speed is performed e.g. sucking versus a positive air flow, would have been an obvious design choice only once it was known to develop the mach 1 speed. The remaining limitations would then have been obvious design choices only or are well known in the art. For example, preliminary screening is well known in the pulverizing art and of no patentable merit.

Claim Rejections - 35 USC § 103

Claims 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muschelknautz et al in view of New. Muschelknautz et al discloses the basic process. It is not clear from the patent what airspeeds are reached. New discloses in column 2 that greater than Mach 1 speed is developed in Muschelknautz et al. Thus the reference combination meets the claimed subject matter except for several limitations

which would have been design choices only or modifications well known in the art. For example, preliminary screening is well known in the pulverizing art and of no patentable merit.
